

Application for Secondary Field in Computational Science and Engineering

Student Name:

Email:

GSAS Home Dept.:

G Year:

Research Advisor:

Proposed Plan of Study

List the **four** courses you propose for your secondary field plan of study:

Core Courses (*choose at least 1 AM and 1 CS core course*)

AM 205 Numerical Methods Completed

AM 207 Stochastic Optimization Methods Completed

CS 205 Computing Foundations of Computational Science Completed

CS 207 Systems Development for Computational Science Completed

Additional Courses

List up to two additional courses in Applied Math or Computer Science. One 299r or one computation-intensive Domain Elective may be substituted. Please see

<https://iacs.seas.harvard.edu/secondary-field-in-cse> for more information.

Course #: _____ Course Title: _____

Completed

Course #: _____ Course Title: _____

Completed

Required Signatures

1. Student: _____

2. Advisor: _____

3. Director of Graduate Studies (in home dept.): _____

Please attach the following to this application; it will not be considered complete without these documents:

1. An up-to-date Harvard transcript
2. A brief statement that addresses a) how this secondary field enhances your current graduate program and b) how your 299r project (if one is proposed) will involve computation.

Application Deadlines (please note late applications will not be accepted):

For entry in Fall (Spring): application is due March 1st (October 1st) of the preceding term
